

## COVID

These are the changes we have put in place to keep everyone safe and have a great holiday

### Cleaning

We are leaving at least 24 hours between guests. We spray all surfaces with alcohol solution before and after normal cleaning routines. We wear masks and gloves for all cleaning.

We air the gites as much as possible between guests.

Our bed linen is professionally cleaned, we make up beds for guests unless you prefer us not to.

All towels are washed to at least 60 degrees. We provide separate towels for the pool.

We have removed all unnecessary items in gites. This includes all cushions, books and games.

We use throws on sofas and soft chairs which we wash between guests.

### Welcome

We will meet you in person, observing social distancing when you arrive to show you your gite and our other facilities. However, we can arrange a self-check in if you would feel more comfortable.

This will mainly be outside so we do not wear masks unless you prefer we do and you let us know.

We have put our guest information on line see [www.autempsdelanature.eu/en/information](http://www.autempsdelanature.eu/en/information)

## **Swimming Pool**

We spray the entrance to the gate and the furniture around the pool every day with a hydroalcoholic solution. The spray is available for you to use if you want to throughout the day.

We have removed all inflatables and other toys. Please bring your own if you would like but we ask that they are removed from the pool areas when not in use.

We have removed all the cushions from our sunloungers.

We have alcohol gel available and ask that guests use this for their hands every time they enter and leave the swimming pool.

When we have more than one group staying with us we can allocate sunloungers to a group if you would feel more comfortable.

We ask that all guests respect social distancing in the pool and surrounding areas.

## **Shared areas**

There are areas on site that are shared. We provide alcohol gel in all areas and ask that guests use this before and after using any shared spaces and facilities. We spray the furniture in shared areas every day with a hydroalcoholic solution.

## **Children's play area**

We provide alcohol gel and ask parents to ensure that their children use the hand gel before and after using the play equipment.

We spray the play equipment every day and spray is available for you to use any time during the day.
